

Solar-powered Water Pumping Project in Rural India Won by Kirloskar Brothers Limited, India with GreenBrilliance's Solar Photovoltaic Panels

Solar energy driven deep well pumping systems designed and engineered by Kirloskar Brothers Limited use GreenBrilliance high efficiency and high wattage solar panels !

Press Release Correction: Kirloskar Brothers Limited, India's largest manufacturer and exporter of centrifugal pumps and pumping systems, a company which built the world's largest pumping scheme in Gujarat, and a flagship company of the pioneering Kirloskar Group of companies, places a prestigious order on Green Brilliance Energy Private Limited (Vadodara, India) , a wholly-owned subsidiary of GreenBrilliance Holdings LLC, (<http://www.greenbrilliance.com>) for supply of solar photo-voltaic modules and their installation under the solar water supply project in remote areas of Gujarat. GreenBrilliance will supply and install the PV modules in the remote talukas of Danta and Amirgarh near Palanpur.

These solar pumping systems will provide water from 10,000 litres per day to 5,000 litres per day per pumping system from the bore-well depths of 30 meter to 70 meter. (100 feet to 200 feet approximately) saving the villagers the exertions of running hand pumps by using patented KIRLOSKAR solar drive controllers and high energy , high efficiency GreenBrilliance solar photovoltaic panels.

The lack of power supply in these areas leads GreenBrilliance management to expect to sell a large number of solar pumping systems in rural areas of India. All systems are equipped with high wattage and high efficiency GreenBrilliance panels and can supply water up to 1,00,000 litres per day. These systems can be used for both drinking water and irrigation purposes.

"We are very excited to supply and construct such systems, and to secure essential water supply for people of Gujarat in remote areas. This project is a significant addition to the company's services portfolio," said Mr. Amit Srivastava, managing partner, GreenBrilliance.

About GreenBrilliance (<http://www.greenbrilliance.com>)

GreenBrilliance Energy Pvt. Ltd. (Vadodara, India) is the manufacturing and services arm of the global company in India, producing world-class, efficient crystalline solar modules for use in solar energy systems and offering solar energy solutions such as solar power plants, solar pumping systems, mini solar grid tie and off-grid systems. The company's product line is comprised of large-size modules (72 cells, 60 cells, and 54 cells) and ranging from 200 Wp to 280 Wp.

GreenBrilliance LLC, based in the Washington, D.C. area, provides turnkey solar solutions for residential and commercial customers, with services including assessment, design, installation, maintenance and service.
